Item #3330400 SH CH-200 PLATFORM HOIST BRIGGS&STRATTON

This 200 lb. capacity power ladder includes:

- Three 8-foot sections of track with splice plates
- A 2.5-foot base with carriage assembly
- A self-storing plywood carrier
- A one-year warranty
- Instructional installation video

Each Safety Hoist ladder hoist is simple to operate. Its one-person operation requires very little training. All of our power ladders are durable yet light weight, which makes them easily portable. Our roofing ladders are perfect for moving material to where it actually needs to go—high-pitched roofs and hard-to-reach areas included. No special tools are required for assembly or operation, and units are field repairable in minutes.

Our shingle elevators are safe and OSHA-compliant. Our unique unloading ramp allows you to discharge materials away from the edge of the roof for increased safety and efficiency. Our custom support brace provides extra support for longer ladder lengths. All of this combines to reduce both the risk of injuries and injuries themselves.

Your savings in medical leave days and workers compensation claims make our ladderlifts even more cost-effective than other automated approaches for moving materials. You also save time, effort, and labor costs.

- Portable
- Rugged all-steel construction
- Equipped with heavy-duty track sections
- Quick to set up
- Easy to assemble, no special tools required
- Constructed of sections that simply bolt together
- A one-person operation
- 5 ft. standard, 42.5 ft. maximum
