CertainTeed's NorthGate SBS modified asphalt shingle is unmatched by other standard asphalt shingles. The rubberizing aspect of SBS allows greater flexibility so the shingles resist cracking even in extreme cold-weather, allowing for year round application. SBS also offers superior granule adhesion which is one of the key components in protecting the shingle against the elements.

- Class IV Impact Resistant, the highest rating available
- Greater cold-weather flexibility
- Increased ductile properties and granule adhesion
- Enhanced crack resistance
- Better weatherability
- Shrink resistance
